Progress on TRA Plan - Objectives

CAS RN	Substance Name	Objectives
NA - 06	Copper (and its compounds)	The objective of this plan is to determine opportunities that may be available and which are technically and economically feasible to reduce the use of identified toxic substances.
NA - 14	Zinc (and its compounds)	The objective of this Plan is to identify and evaluate a variety of toxics substance reduction options to reduce the use, disposal and contained in product of zinc at the Facility. Further, this plan will determine the technical and economic feasibility of each option to determine which, if any, are viable for implementation at this time. Based on a review of the Facility's operations, Corvex was unable to identify any feasible reduction options. Therefore, there are no reduction objectives. Corvex will strive to reduce the use, disposal or contained in product of zinc in the future, should an option become available.
