Toxic Reduction Policy Statement of Intent

Skyjack Inc. (Skyjack) Plant 2 Facility (Plant 2) creates 10 µm particulate matter (PM10) in three processes. The Facility does not intend to reduce the creation of this toxic substance at the Facility.

Reduction Objectives

Skyjack prides itself on technological innovation in order to produce scissor lifts in an environmentally responsible manner. Skyjack's manufacturing operation has been optimized to minimize the use of raw

materials. Skyjack will strive to reduce the use, disposal and release to air of PM10 at the Facility in the future should an option become available.

Description of Facility

Skyjack Inc. manufactures conventional and rough-terrain scissor lifts. The units undergo welding and pre-treatment in various production lines, and are then coated using various painting spray booths, then assembled, tested and stored. PM10 is created and released from the Facility through combustion, painting and welding operations.

The North American Industry Classification System (NAICS) Code that applies to this Facility is 333920 – Material Handling Equipment Manufacturing.

In 2012, the Facility operated 24 hours per day, 5 days per week.

Toxic Substance Reduction Options to be Implemented

There were no options identified that can be implemented by Skyjack to reduce the use, disposals or releases of PM10.
